PART III - DETERMINATION OF SIGNIFICANCE (To be completed by Agency)

INSTRUCTIONS: For each adverse effect identified above, determine whether it is substantial, large, important or otherwise significant. Each effect should be assessed in connection with its (a) setting (i.e. urban or rural); (b) probability of occurring; (c) duration; (d) irreversibility; (e) geographic scope; and (f) magnitude. If necessary, add attachments or reference supporting materials. Ensure that explanations contain sufficient detail to show that all relevant adverse impacts have been identified and adequately addressed. If question D of Part II was checked yes, the determination of significance must evaluate the potential impact of the proposed action on the environmental characteristics of the CEA.

- ☐ Check this box if you have identified one or more potentially large or significant adverse impacts which **MAY** occur. Then proceed directly to the FULL EAF and/or prepare a positive declaration.
- ☐ Check this box if you have determined, based on the information and analysis above and any supporting documentation, that the proposed action **WILL NOT** result in any significant adverse environmental impacts **AND** provide, on attachments as necessary, the reasons supporting this determination.

SHORT ENVIRONMENTAL ASSESSMENT FORM

6. Describe project briefly

Applications have been made to the Zoning Board of Appeals, pursuant to Article 7, Section 7.1.2 since 1969, and have been granted to the applicant for his business in a residential district on a three to five year basis. We are now told that this application for a Special Permit must be made to the Village Board.

The applicant is a mail order business and re-manufactures or assembles parts or pieces of equipment, notably conveyor belts.

The building was used as a plating plant for approximately 40 years prior to the use of the existing business and was a non-conforming use at the time the zoning ordinance was adopted.

The applicant is currently requesting an extension for five (5) years or more.

The use is not offensive and has been there for over 30 years.

Nothing is stored outside the building.

This use is less noxious than the previous use.

There have been no changes in circumstances since the last application.
