Re: Proposal for Design of Georgia Lane/Waldwood Subdivision Storm Water Management Basin Outlet Structure and Culvert Improvements at Park Trail Lane

Dear Mr. O'Connor:

As per your request, Dvirka and Bartilucci Consulting Engineers (D&B) is pleased to submit this proposal to design a new outlet structure and associated discharge pipe for the Georgia Lane/Waldwood Subdivision Storm Water Management Basin. In addition, D&B will provide design services for the replacement of the existing culvert at Park Trail Lane immediately downstream of the basin. These improvements will be designed in accordance with the recommendations provided in the Georgia Lane/Waldwood Subdivision Storm Water Management Basin Engineering Design Report.

D&B will prepare design documents, specifications and bid sheets suitable for obtaining price quotes and constructing the proposed improvements. D&B will also provide shop drawing review during construction. The Village will provide approximate utility information for utilities located within the project limits. The Village will also provide the necessary front end documents for the project. We are anticipating that the estimated construction cost will allow for the Village to obtain price quotes as opposed to the public bid process.

The not to exceed fee for the scope of work described above is \$8,500.

We thank you for this opportunity to be of continued service to the Village. If there are any questions, please feel free to contact me at (516) 364-9890.

Very truly yours,

Jason R. Tonne
Associate
