Re: Proposed Solar Array at Hudson National

This memo will serve as an update to the special permit applications that were filed by Matrix Development and the Hudson National Golf Club in August 2020. These applications have been deferred since January 2022, while the Village Board awaited the submission of a new Full Environmental Assessment Form from the applicants.

On December 23, 2022, and January 3, 2023, Matrix Development and Hudson National Golf Club, respectively, submitted letters to formally withdraw their special permit applications and other related applications in relation to the above project. These letters are available for review on the project page of the Village website.

At this time, the Village considers the project closed and no further action is needed by the Village Board.
