Subject: Grand Street Firehouse - additional funds

Bryan,

We are approaching the end of the structural reinforcement project for the Grand Street Firehouse. This project was designed by an Engineering Consultant, and built mostly in-house. As usual, performing projects this way helps keep costs down, and also allows the DPW to get involved with Village Capital Improvements.

As you know, this project was never really funded as a typical project. Funds were set aside for Capital Improvements to Grand Street firehouse many years ago. This was a benefit as we were able to move forward with improvements as they came up in the past few years.

Unfortunately, we are running out of funding, and require additional money to complete construction. The following is a list of tasks needed to be done:

- Welding - \$ 8,000
- Epoxy floor - \$34,500
- Concrete - \$6,000
- Plumbing - \$ 4,000
- Electrical - \$3,000
- Labor - \$5,000
- Tool Rental - \$1,000
- Garage Door Adjustment - \$ 1,500

This work is expected to cost \$ 63,000.

As a reminder, there were different aspects to this project that came out of the existing funding for this project (temporary shoring of the floor, all of the design work, inspections and certifications, etc.).

I would like to request funding in the amount of \$63,000 to complete the work needed for the structural improvements to the Grand Street firehouse. Please let me know if additional information is needed.

Best Regards,

Frank Balbi, P.E.
