Dear Village Trustees,

The Croton Conservation Advisory Council requests that the following statement be read as correspondence at the next village board meeting. We would like this paragraph to be included in the RFP (request for proposal) in the next landscaper contract.

The following is a request from the Croton Conservation Advisory Council (CAC) to the Croton village government regarding gas-powered leaf blowers (GLB). The CAC requests that the village includes language in the next contract with the selected landscaper that requires compliance with the current GLB regulation. Specifically, the landscaper is required to follow the Croton GLB regulation for both their private residential and commercial customers in Croton.

Thank you,

Janet Monahan

Chair Croton Conservation Advisory Council
