

Small Shed

We installed this shed last fall not realizing we needed to apply for a variance. Our neighbor communicated that this shed would not be an issue for them.

Medium-Sized Shed Current Location (construction is halted)

We commenced construction on this shed not realizing that we would need a variance. Thanks to Ron for communicating that we should halt construction on this shed and apply for a variance, so that we do not receive a fine. We propose moving the shed to the area by our patio (see previous pic).

Deck to Replace

This deck has rapidly declined since we purchased this home in 2016. The wood boards are rotten and chair legs have gone through them on several occasions. We would like to excavate the earth under the deck to create a shaded area (there is very little tree coverage and shade on our property).
