VILLAGE OF CROTON-ON-HUDSON VEB 2025 Annual Report

In 2025 the VEB approved 15 New/Updated Signage Applications, with many of them having active feedback and dialogue, well accepted by applicants. We also took part in helping assist in many design choices and aesthetics throughout the village such as the new village clock by Maple Commons.

Moving Forward In 2026 and Beyond, the VEB is hopeful to become more involved with the planning board, and other village committees in reviewing the aesthetics of building proposals seeking planning/zoning/building approval, as well as getting involved with any village initiatives focused on beautification and discuss potential grants the village may be looking into related to aesthetics.
