Dear Bryan,

The presentation at the recreation advisory meeting last evening was very informative. Bruce Odland presented a compelling case for accepting the donation of two harmonic art pieces. The concept of utilizing cubed speakers to absorb highway noise and provide a harmonized soundtrack is very interesting.

Once the village determines the costs for installation and necessary upgrades, we concur that this would be a worthwhile project, provided it falls within the parameters of the village budget.

We recommend that the installation remains consistent with the color and aesthetics of the park. Additionally, we suggest providing public information so the community understands the purpose and function of these art pieces.

We appreciate the support from the Village Arts and Humanities Advisory Council and thank the village for considering this project.

Best regards,

Debi Braddick
