Re: 2026 Resurfacing Program – list of roadways to be paved

During this year's resurfacing program, we are focusing on an area of the Village that has not been paved in a while and needs attention. I have included an overall resurfacing map dating back to 2013. We use this as a general guideline to sections of the Village that have recently been resurfaced. This map along with conditions of the roadways help determine our next section of roadways to be updated. Please note that this map has been updated to show the recent paving of Cleveland Drive, but does not include the list of roadways shown below.

This year, with the additional funding approved by the Village Board, as well as the annual New York State CHIPS reimbursements, we are able to resurface more roadways than we have in the past. Coupled with the resurfacing of Cleveland Drive, this allows DPW to treat a large area of the Village, making it easier to keep up with the conditions of our roadways.

List of roadways to be paved:

Roadway	From	To	Length (ft.)
Radnor Avenue	Cleveland Drive	Ridge Road	2000
Darby Avenue	Olcott Avenue	Dead End	680
Batten Road	#44 Batten Road	Village Limit	1140
Penfield Avenue	Oneida Avenue	Dead End	450
Kuney Street	Cleveland Drive	Dead End	255
Hastings Avenue	Benedict Blvd.	Oneida Avenue	670
Elliot Way	Yacht Club	Croton Landing	800
Ridge Road	Bungalow Road	Dead End	900
Melrose Avenue	Cleveland Drive	Dead End	1060
Irving Avenue	Cleveland Drive	Dead End	1065
Emerson Avenue	Cleveland Drive	Dead End	1003
Thompson Avenue	Cleveland Drive	Dead End	1065
Elmore Avenue	Cleveland Drive	Dead End	1671

Total Length: 12,759
