1 Van Wyck Street
Croton-on-Hudson, NY 10520

RE: DESIGN SERVICES HARMON FIREHOUSE ROOF REPLACEMENT

Dear Mr. Marsh

We are pleased to submit our firm's background information and professional qualifications to provide design services for the Village.

Fuller and D'Angelo has been providing design services to municipalities in Westchester County for over 50-years. The principals of our firm, second-generation architects, provide these services directly to all our clients, on a personalized basis. The principals are supported by a skilled and experienced team, which we are proposing for this project. Fuller and D'Angelo has completed a diverse range of projects over our firm's history, both large and small. These projects include new buildings, interior alterations, building conversions, exterior envelope restorations, facilities planning and master planning all on a diverse range of architectural styles and building vintages.

As a local firm of 15 employees with 4 registered architects, we take pride in every project we undertake. This size allows us to work closely with our clients, providing direct principal leadership every step of the way, while still having the overall manpower to meet the scheduling demands of any project.

We are committed to making certain that your goals and expectations are met through our expert services and will strive at every level of our organization to do so. We are pleased to have been given this opportunity and thank you in advance for your consideration.

Sincerely,

A handwritten signature in blue ink, appearing to read 'JD'.

John D'Angelo, ARA, LEED AP
JD'A/vc

INTRODUCTION

FIRM HISTORY

Joseph Fuller, AIA and Nicholas D'Angelo, FARA, CSI founded Fuller and D'Angelo, PC, Architects and Planners in 1971. With hard work, determination, and a desire to excel, these Principals grew a firm that has become internationally known and locally respected. Today, the second generation continues their philosophy that our reputation is built on personal relationships, quality, and value in service.

Passion demands expression from an architect. Our architecture happens as a result of that demand. F&D continues to spearhead projects under the guidance of Joseph Fuller Jr., AIA., and John D'Angelo, ARA. Our staff is comprised of Project Planners, Designers, Architects, Draftsmen, CAD experts, Interior Designers, FFE experts and various professional consultants. F&D is equipped to undertake multiple projects with varying levels of complexity.

Our mission is to satisfy our client's objectives on time, accurately, and within budget.

Although we are proud of our 55-year history in providing traditional architectural services, we are committed to the future. The future of educational architecture requires additional skill-sets, not even contemplated in the buildings of 20 years ago. Architecture now requires the adaptation of Information Technology into virtually every design. Indeed, we live in the "Age of Technology" and buildings now require more than electricity and plumbing, they require fiber backbones, digital switching, network security considerations and sustainable practices for healthy environments. Fuller & D'Angelo works closely with its clients to develop specifications and designs that will not only meet the needs of today, but also provide integral flexibility for the technologies of tomorrow.

Our design methodology we employ allows us to work in both conservative and cutting-edge environments. With consistent participation by the project team, ideas are realistically explored through what we call our "Cooperative Design Process."

This iterative process takes a broad perspective review to design solutions, and through supportive client participation and feedback encapsulates them into a physical, modular architecture that will further be rendered into a final design.

We are sincerely interested in the success and satisfaction of our clients.

The partners of Fuller and D'Angelo thank you in advance for your consideration of our firm.
