A SITE CONFIGURATIONS

*See installation guide

- Step 1. Begin with installing any logos (left or right Exxon or Mobil): back skin, side return, LED tray, power supplies and face.
- Step 2. Install logo corner panels on either side of the logo and the ends of each run.
- Step 3. Install mounting brackets and 120" ACM panels, cutting one panel per side to fit.
- Step 4. Install LED corners first, then install 118" LED downlight starting with ACM panel next to the logo. Install short downlight, cut to length or overlap as required on each side for site conditions.
- Step 5. Install (1) power supplies every other panel and connect to LEDs. Each corner downlight comes with their own power supply.
- Step 6. Install junction box power circuits every 200 feet for each side as required by site layout. Electrician to connect to 120VAC.
- Step 7. Install end caps.
