INTERLOCAL WASTEWATER TREATMENT AND CONVEYANCE AGREEMENT BETWEEN THE CITY OF SPRING HILL, TENNESSEE AND THE CITY OF COLUMBIA, TENNESSEE

THIS INTERLOCAL WASTEWATER TREATMENT AND CONVEYANCE AGREEMENT ("Agreement") is made and entered into by and between the CITY OF SPRING HILL, TENNESSEE ("Spring Hill"), a Tennessee municipal corporation, and the CITY OF COLUMBIA, TENNESSEE ("Columbia"), a Tennessee municipal corporation, as of the last date of execution stated below. Spring Hill and Columbia may be referred to individually as a "Party" and collectively as the "Parties."

WHEREAS, Spring Hill owns and operates a municipal wastewater collection, conveyance, and treatment system and is evaluating regional solutions to provide reliable wastewater capacity for existing customers, committed development, and the long-term needs of the community; and

WHEREAS, Columbia owns and operates a municipal wastewater collection, conveyance, and treatment system and is constructing additional wastewater treatment capacity; and

WHEREAS, the Parties have evaluated the feasibility of conveying wastewater generated within Spring Hill to Columbia for treatment and disposal; and

WHEREAS, the preliminary project concept provides for the conveyance not to exceed one and one-half million gallons per day (1.5 MGD) from Spring Hill's wastewater system to Columbia's wastewater system through a metered interconnection; and

WHEREAS, the preliminary project concept includes modifications to Spring Hill's Main Sewage Pumping Station, approximately 23,600 linear feet of force main, crossings and appurtenances, and connection to Columbia's wastewater system, all as more particularly described in the preliminary engineering materials attached hereto as exhibits; and

WHEREAS, Spring Hill has agreed to design, permit, acquire necessary property interests for, construct, own, operate, maintain, repair, and replace the Spring Hill Interconnection Facilities, as defined below; and

WHEREAS, Spring Hill has further agreed to fund an upgrade to an existing Columbia wastewater pumping station (Carter's Creek Sewage Pumping Station), located at 314 Carter's Creek Pike Columbia, TN 38401, required to receive and convey Spring Hill's wastewater, provided Spring Hill's contribution for that upgrade shall not exceed Three Million and 00/100 Dollars ($3,000,000.00), except by a written amendment approved by both parties; and

WHEREAS, Columbia shall reserve and make available to Spring Hill, upon the Effective Date, treatment capacity of 1.5 MGD for a thirty (30) year term established by three 10-year periods, subject to the terms, conditions, regulatory requirements, and protections set forth herein; and

WHEREAS, Spring Hill is pursuing regulatory approval from the Tennessee Department of Environment and Conservation (TDEC) to convey up to 1.5 MGD of wastewater to Columbia as part of Spring Hill's wastewater capacity management and treatment plant expansion strategy, including the use of the conveyance to offset flows otherwise treated at Spring Hill's wastewater treatment plant; and

WHEREAS, the Parties acknowledge that implementation of the wastewater conveyance contemplated by this Agreement is contingent upon TDEC's written approval or authorization of the proposed conveyance following its review of Spring Hill's Letter of Intent and any other information required by TDEC; and

WHEREAS, this Agreement is entered pursuant to the Tennessee Interlocal Cooperation Act, Tenn. Code Ann. §§ 12-9-101, et seq., and other applicable law; and

WHEREAS, each Party has determined that this Agreement promotes the efficient and mutually advantageous provision of public wastewater services and is in the best interest of the citizens of both Spring Hill and Columbia.

NOW, THEREFORE, in consideration of the mutual covenants and obligations contained herein, the Parties agree as follows:

1. Purpose:

The purpose of this Agreement is to establish the terms under which Columbia shall reserve wastewater treatment capacity for Spring Hill and accept, convey, treat, and dispose of wastewater delivered by Spring Hill through the Point of Delivery, and under which Spring Hill shall construct and operate the facilities necessary to deliver such wastewater and pay the applicable capital and service charges.

2. Authority and Required Approvals:

a) This Agreement is made pursuant to the Tennessee Interlocal Cooperation Act, Tenn. Code Ann. §§ 12-9-101, et seq., and all other applicable authority.

b) Each Party shall obtain approval of this Agreement from its governing body and shall complete any filing, approval, or review required by law. Each Party represents that the person executing this Agreement on its behalf is duly authorized to do so.

c) Nothing in this Agreement shall be construed to delegate or surrender any legislative, regulatory, rate-setting, police, or governmental power that cannot lawfully be delegated or surrendered.

d) TDEC Approval Condition Precedent. Notwithstanding any other provision of this Agreement, the Parties' obligations to proceed with the wastewater conveyance, capacity reservation, capital improvements, construction, service commencement, and payment obligations contemplated herein are expressly conditioned upon TDEC providing written approval or authorization allowing Spring Hill to convey wastewater to Columbia substantially as contemplated by this Agreement. Spring Hill shall submit its Letter of Intent and such supporting information as TDEC may reasonably require. If TDEC approves or authorizes the proposed conveyance, the Parties shall proceed with implementation of this Agreement in accordance with its terms. If TDEC denies the proposed conveyance, or provides a final written determination that the conveyance cannot be permitted or authorized substantially as contemplated herein, this Agreement shall be null and void and neither Party shall have any further obligation to the other under this Agreement, except for obligations expressly stated to survive termination and any obligations separately incurred under another written agreement. The Parties may mutually agree in writing to amend the proposed conveyance to address conditions imposed by TDEC.

3. Definitions:

a) Reserved Capacity. means one million five hundred thousand (1,500,000) gallons per day (1.5 MGD) of Columbia wastewater conveyance and treatment capacity reserved for Spring Hill pursuant to Section 4.

b) Columbia Pump Station Upgrade. means the improvements to an existing Columbia wastewater pumping station located at Carter's Creek Sewage Pumping Station, 314 Carter's Creek Pike Columbia, TN 38401, that Columbia determines are reasonably necessary to receive and convey Spring Hill Wastewater, with Spring Hill's contribution shall be as provided in Section 6.

c) Effective Date. means the date on which this Agreement has been approved, signed, and filed as required by applicable law; provided, however, that implementation and performance of the wastewater conveyance and related obligations remain subject to the TDEC Approval Condition Precedent set forth in Section 2(d).

d) Interconnection Facilities. means all pumps, wet wells, piping, force mains, valves, meters, controls, SCADA components, crossings, easements, and other facilities used to convey Spring Hill Wastewater to the Point of Delivery, excluding facilities expressly identified as Columbia-owned facilities.

e) Point of Delivery. means the mutually agreed upon connection point at which ownership, operational responsibility, and custody of Spring Hill Wastewater transfer from Spring Hill to Columbia, as depicted in Exhibit A.

f) Spring Hill Wastewater. means wastewater originating within Spring Hill's lawful service area and delivered by Spring Hill to the Point of Delivery in compliance with this Agreement.

g) Service Commencement Date. means the date on which Columbia provides written confirmation that the Columbia facilities are available and the Interconnection Facilities have been accepted for operational connection.

4. Reservation and Provision of Capacity:

a) Columbia shall accept from Spring Hill wastewater conveyed through the agreed-upon force main and connection facilities at a minimum daily flow quantity of five hundred thousand (500,000) gallons within any continuous twenty-four (24) hour period and at a maximum daily flow quantity not to exceed one million five hundred thousand (1,500,000) gallons within any continuous twenty-four (24) hour period. Spring Hill shall have the right to convey wastewater to Columbia in quantities up to the maximum daily flow quantity, subject to the terms and conditions of this Agreement and all applicable federal, state, and local laws, rules, regulations, permits, and discharge requirements.

b) Columbia shall reserve and maintain wastewater treatment capacity of one million five hundred thousand (1,500,000) gallons per day (1.5 MGD) exclusively for Spring Hill throughout the Term of this Agreement, regardless of the actual volume of wastewater conveyed by Spring Hill. Spring Hill's failure to utilize all or any portion of the Reserved Capacity shall not reduce, relinquish, terminate, or otherwise affect Spring Hill's right to the full 1.5 MGD of Reserved Capacity. Any unused portion of the Reserved Capacity shall remain reserved for Spring Hill and shall not be allocated, committed, sold, assigned, pledged,

or otherwise encumbered by Columbia in a manner that would reduce the capacity available to Spring Hill below 1.5 MGD.

5. Spring Hill Interconnection Facilities:

   a) Spring Hill shall be responsible for the planning, engineering, permitting, easement and property acquisition, procurement, construction, testing, commissioning, ownership, operation, maintenance, repair, and replacement of the Interconnection Facilities located upstream of the Point of Delivery.

   b) The preliminary concept includes modifications to Spring Hill's Main Sewage Pumping Station and approximately 23,600 linear feet of force main designed to convey 1.5 MGD. Final design may be modified based on engineering, permitting, field conditions, and written coordination between the Parties.

   c) Spring Hill shall provide Columbia a reasonable opportunity to review plans and specifications that may affect Columbia's facilities. Columbia's review shall be limited to compatibility, safety, operability, and protection of Columbia's system and shall not shift design responsibility from Spring Hill or its consultants.

   d) Spring Hill shall obtain and maintain all permits and approvals applicable to its Interconnection Facilities. Columbia shall reasonably cooperate with applications requiring Columbia's participation.

   e) No material change to the Point of Delivery or connection configuration shall be made without written approval of both Parties.

   f) Spring Hill shall construct flow metering facilities as part of the Interconnection facilities using a flow metering device mutually agreed by Spring Hill and Columbia. Columbia shall have physical and digital access to the flow metering facilities and Columbia shall be responsible for intermittent calibration and maintenance to the flow metering device. The flow metering device shall be located in a location with reasonable ease of vehicle access.

   g) No future connections or taps shall be made to the proposed force main from Spring Hill's Main Sewage Pumping Station to the Point or Delivery.

6. Columbia Pump Station Upgrade:

   a) Columbia will plan, design, permit, procure, construct, own, operate, maintain, repair, and replace the Columbia Pump Station Upgrade. The current scope and budget of the project are provided in Exhibit C.

   b) Spring Hill will reimburse Columbia for the actual, reasonable, and documented costs of the Columbia Pump Station Upgrade, including design, permitting, construction, construction administration, and directly related professional services, in an aggregate amount not to exceed Three Million and 00/100 Dollars ($3,000,000.00).

   c) Columbia will provide Spring Hill with plans, cost estimates, bid tabulations, contracts, change orders, invoices, and other reasonably requested supporting documentation. Spring Hill will review and comment on the scope and cost before Columbia awards a construction contract.

d) Any expenditure or commitment that would cause Spring Hill's contribution to exceed $3,000,000.00 requires a written amendment approved by both governing bodies. Spring Hill will have no obligation for excess costs absent such amendment.

e) Payments shall be made within thirty (30) days after receipt of complete invoice and supporting documentation. Columbia will separately account for the upgrade costs and shall permit Spring Hill to audit the records upon reasonable notice.

f) Upon payment, the Columbia Pump Station Upgrade will remain the sole property of Columbia. Spring Hill's payment shall not create an ownership interest but will support the long-term capacity rights granted by this Agreement.

g) The pump station upgrade shall be completed by Columbia within 24 months of the Effective Date of this agreement or by the established date of substantial completion of the Columbia Wastewater Treatment Plant expansion project, whichever is later. Upon completion of the pump station upgrade and Wastewater Treatment Plant expansion project, Columbia shall notify Spring Hill that the use of the proposed Interconnection Facilities may commence.

7. Wastewater Treatment Charge and Billing:

a) Spring Hill will pay Columbia a minimum daily wastewater treatment charge equal to the treatment of five hundred thousand (500,000) gallons of wastewater within any continuous twenty-four hour period, multiplied by Spring Hill's then current Sewer Volume Charge per one thousand ($1,000) gallons in effect on the date the charge is incurred. The minimum daily wastewater treatment charge will be due and payable regardless of the actual wastewater conveyed to Columbia in such continuous twenty-four (24) hour period.

b) For all wastewater conveyed by Spring Hill to Columbia in excess of five hundred thousand (500,000) gallons of wastewater per continuous twenty four (24) hour period up to Spring Hill's maximum contracted allowance of one million five hundred gallons (1,500,000) per continuous twenty four (24) hour period, Spring Hill will pay Columbia the minimum charge referenced in (a) above PLUS the actual number of gallons in excess of five hundred thousand (500,000) gallons multiplied by Spring Hill's then current Sewer Volume Charge per one thousand (1,000) gallons in effect on the date the charge is incurred.

c) Columbia will invoice monthly and will include metered flow, applicable rate components, adjustments, credits, and sufficient detail to verify the charge. Spring Hill will pay undisputed amounts within thirty (30) days.

d) Spring Hill may dispute an invoice by written notice within sixty (60) days without releasing Columbia from its contractual obligation hereunder. The Parties will promptly confer and attempt to resolve the dispute amicably. Spring Hill will pay undisputed portions of said invoice pending resolution of the dispute.

e) No rate shall include fines, penalties, damages, or costs resulting from Columbia's negligence, violation of law, breach of this Agreement, or service to other customers.

f) Columbia shall maintain records supporting charges for at least seven (7) years. Spring Hill may audit such records upon reasonable written request not more than once annually, except where a material discrepancy is identified.

8. Future Capital Improvements and Extraordinary Costs:

   a) Columbia will remain responsible for ordinary operation, maintenance, repair, renewal, and replacement of Columbia-owned facilities.

   b) If a new regulatory requirement or capital improvement is reasonably necessary primarily because of Spring Hill Wastewater or Spring Hill's reserved capacity, Spring Hill shall pay a fair and proportionate share. Columbia shall provide engineering support, cost estimates, alternatives, allocation methodology, and proposed financing to support the proposed cost share.

   c) Spring Hill shall not be responsible for costs attributable to Columbia's existing customers, growth unrelated to Spring Hill, correction of pre-existing deficiencies, deferred maintenance, penalties, or improvements providing capacity beyond that reserved for Spring Hill, except to the extent Spring Hill voluntarily agrees in writing.

   d) No extraordinary capital contribution shall be due unless approved in a written amendment by both governing bodies. Pending agreement, Columbia will continue providing service to the extent legally and physically possible.

9. Metering and Flow Measurement:

   a) Spring Hill shall install, own, operate, calibrate, and maintain a revenue-quality electromagnetic flow meter at a mutually agreeable location, together with totalization, telemetry, and redundant data retention acceptable to both Parties.

   b) The meter shall be tested not less than annually and whenever either Party reasonably questions accuracy. If errors exceed two percent (2%), billing shall be adjusted for the reasonably determinable period of error, not exceeding six (6) months absent evidence of a longer period.

   c) Both Parties will have real-time or reasonably current access to flow data and alarms.

10. Wastewater Quality and Pretreatment:

   a) Spring Hill Wastewater shall comply with applicable law and Columbia's approved pretreatment program, provided such standards are applied to Spring Hill on a nondiscriminatory basis.

   b) If industrial users are connected to Spring Hill's wastewater collection system and their wastewater is conveyed to Columbia under this Agreement, Spring Hill shall comply with all applicable TDEC requirements governing industrial wastewater, including implementation of industrial pretreatment, source-control measures, monitoring, permitting, reporting, and other controls where required by TDEC or applicable law.

   c) Spring Hill shall remain responsible for administration and enforcement of applicable industrial-user requirements within its service area and shall require pretreatment or other corrective measures for industrial discharges where necessary to protect the Spring Hill and Columbia wastewater systems, Columbia's treatment processes and permit compliance, and receiving waters. Spring Hill shall coordinate with TDEC and Columbia, as applicable, regarding industrial users whose discharges may be conveyed through the Interconnection Facilities.

d) Columbia may sample Spring Hill Wastewater at the Point of Delivery upon reasonable written request. Columbia will promptly provide Spring Hill test results.

e) If Spring Hill Wastewater presents an imminent threat to health, safety, treatment operations, permit compliance, or the environment, Columbia may require immediate corrective action and may temporarily restrict or suspend acceptance only to the extent reasonably necessary. Columbia shall provide prompt notice and cooperate to restore service.

f) Spring Hill shall be responsible for actual, reasonable, and documented costs, fines, or damages directly caused by Spring Hill's material violation of this Section, subject to available defenses and applicable law.

11. Operations, Maintenance, and Coordination:

a) Each Party will operate and maintain its facilities in accordance with regionally acceptable utility practice, applicable permits, and law.

b) The Parties shall develop written standard operating procedures addressing normal operations, start-up, shutdown, alarms, emergency contacts, planned maintenance, wet-weather conditions, communications, and incident reporting.

c) Each Party shall provide reasonable advance notice of planned work that may affect service. Except in an emergency, Columbia shall not interrupt acceptance of Spring Hill Wastewater without at least thirty (30) days written notice and reasonable coordination.

d) The Parties shall meet not less than annually to review flows, capacity utilization, regulatory status, capital planning, rates, and operational issues.

12. Regulatory and Capacity Protection:

a) The Parties acknowledge that wastewater service is subject to permits, orders, laws, and regulatory action. Neither Party guarantees that regulatory requirements will remain unchanged.

b) Columbia will use diligent, good-faith efforts to obtain, maintain, renew, and comply with permits and approvals necessary to honor the Reserved Capacity. Columbia will not voluntarily seek or accept a permit modification that materially reduces Spring Hill's reserved rights without Spring Hill's prior written consent, unless required by law or a regulatory authority.

c) Columbia will promptly notify Spring Hill of any actual or threatened permit action, consent order, capacity limitation, equipment failure, construction delay, or other circumstance reasonably expected to impair service.

d) If a regulatory authority requires a temporary reduction, the Parties shall cooperate on mitigation, storage, flow management, temporary treatment, alternate routing, capital improvements, and regulatory relief.

e) If Columbia is unable to provide Reserved Capacity, it is understood that Columbia will prioritize flows necessary to protect public health and existing connected customers. Subject to that limitation, Spring Hill's Initial Reserved Capacity will have priority over capacity commitments made after the Effective Date.

f) A regulatory restriction will not permanently extinguish Spring Hill's reserved rights. Once the restriction is removed or capacity restored, Spring Hill's rights will automatically resume.

g) If a permanent regulatory or physical condition prevents Columbia from providing a material portion of the Reserved Capacity for more than twelve (12) consecutive months, the Parties will negotiate in good faith an equitable remedy, which may include restoration projects, substitute capacity, rate credits, extension of the Term, reimbursement of unamortized Spring Hill capital contributions, or termination of the affected capacity. Neither Party will be obligated to approve a remedy requiring an appropriation or capital commitment not approved by its governing body.

h) Construction or commissioning delay will not constitute default if the affected Party is diligently pursuing completion and provides regular written progress reports; however, the Parties will establish milestone dates and outside completion dates in Exhibit C before construction begins.

13. Emergency Conditions and Force Majeure:

a) A Party shall not be in default to the extent performance is prevented by fire, flood, tornado, earthquake, epidemic, pandemic, war, terrorism, civil disorder, utility failure, supply-chain interruption, governmental or other regulatory action, or another event beyond its reasonable control and not caused by negligence.

b) The affected Party shall give prompt notice, describe the expected duration and effect, take reasonable steps to mitigate the impact, and resume full performance as soon as practicable.

c) Force majeure does not excuse payment for services already provided or relieve a Party from maintaining insurance, emergency planning, or reasonable redundancy required by this Agreement.

14. Term; Renewal:

a) The initial term will begin on the Effective Date and continue for ten (10) years. Spring Hill shall have the option to renew the agreement for two (2) additional ten (10) year terms. At the end of each 10-year term, both parties shall review the Agreement and propose desired modifications for review. Both parties agree to work in good faith to reach an agreement regarding any proposed modifications by either party at the end of either ten year term.

b) The Parties may renew this Agreement for additional terms by written amendment approved in writing by both governing bodies.

c) Expiration shall not affect payment obligations, audit rights, liability provisions, ownership, or other provisions that by their nature survive.

15. Default and Remedies:

a) A material failure to perform an obligation under this Agreement will constitute default only after written notice describing the default and a reasonable opportunity to cure. The cure period shall be thirty (30) days for monetary default and sixty (60) days for nonmonetary default, provided that a nonmonetary default requiring more time shall not constitute default if cure is commenced within sixty (60) days and diligently pursued.

b) In the event of any uncured matters, the Parties shall attempt to resolve their differences in good faith. If unresolved within thirty (30) days, the matter shall be submitted to nonbinding mediation unless emergency injunctive relief is necessary.

c) Available remedies include but are not limited to specific performance, declaratory or injunctive relief, recovery of amounts due, and other remedies allowed by law. Termination is a remedy of last resort and may occur only for an uncured material default that substantially defeats the purpose of this Agreement.

d) No termination shall take effect until the Parties have implemented a reasonable transition plan to protect public health and avoid an unlawful discharge, unless immediate termination is required by law.

e) Nothing in this Agreement waives governmental immunity, statutory defenses, damages caps, or procedural protections available under Tennessee law.

16. Allocation of Responsibility:

a) Each Party shall be responsible for its own acts and omissions and those of its officers, employees, agents, and contractors, to the extent provided by law.

b) Nothing herein creates a partnership, joint venture, agency, employment, or fiduciary relationship. Neither Party may bind the other except as expressly stated.

c) Each Party shall maintain insurance or self-insurance customary for a Tennessee municipal wastewater utility and shall provide proof of same to the other party upon reasonable written request.

17. Records, Reporting, and Inspection:

a) Each Party shall maintain records reasonably necessary to administer this Agreement and shall provide relevant nonprivileged records to the other Party upon reasonable request, subject to applicable public-records and confidentiality law.

b) Columbia will provide Spring Hill monthly flow and billing data and annual summaries of system capacity, permit status, significant compliance events, and capital projects reasonably affecting Spring Hill.

c) Upon reasonable written request and subject to safety and security procedures, each Party may inspect facilities of the other Party directly related to performance of this Agreement.

18. Assignment and Successors:

a) Neither Party shall assign this Agreement or any material right or obligation without the prior written approval of the other Party's governing body.

b) This Agreement shall bind lawful successors to the Parties' wastewater systems. A transfer of material system assets shall be conditioned upon the transferee's written assumption of the transferring Party's obligations, to the extent permitted by law.

19. Notices:

All notices required by this Agreement shall be in writing and delivered personally, by nationally recognized overnight delivery, or by certified mail, return receipt requested, to the following addresses, or to another address designated by written notice:

SPRING HILL	**COLUMBIA**
City Administrator City of Spring Hill 199 Town Center Parkway Spring Hill, Tennessee 37174 With a copy to: City Attorney Patrick Carter 809 South Main Street Columbia, TN 38401	City Manager City of Columbia 700 North Garden Street Columbia, Tennessee 38401 With a copy to: City Attorney Jake Hubbell 410 West Seventh Street Columbia, TN 38401

20. Miscellaneous:

a) Modification. This Agreement may be amended only by a written instrument approved and executed by both Parties in the same manner as this Agreement.

b) No Third-Party Beneficiaries. This Agreement is solely for the benefit of the Parties. No customer, developer, landowner, lender, contractor, or other person is an intended third-party beneficiary.

c) Waiver. A waiver is effective only if in writing and shall not constitute a continuing waiver.

d) Entire Agreement. This Agreement and its exhibits constitute the entire agreement regarding the subject matter and supersede prior negotiations and understandings, except that obligations already incurred under a separate reimbursement agreement remain enforceable according to its terms.

e) Severability. If a provision is held invalid, the remaining provisions shall remain effective, and the Parties shall negotiate a lawful replacement that most closely reflects the original intent.

f) Compliance with Law. Each Party shall comply with applicable federal, state, and local law, permits, and regulatory requirements.

g) Governing Law and Venue. Tennessee law governs. Venue for any action shall lie in a court of competent jurisdiction in Maury County, Tennessee, unless applicable law requires otherwise.

h) Counterparts and Electronic Signatures. This Agreement may be executed in counterparts and by electronic signature, each of which shall be deemed an original.

i) Appropriations and Debt. Each Party's monetary obligations are subject to lawful appropriation, budgeting, and constitutional or statutory debt limitations. The Parties intend this Agreement to be a binding long-term utility service contract and shall budget in good faith for obligations becoming due.

j) Headings. Headings are for convenience only and do not limit interpretation.

k) Construction. This Agreement shall be construed as jointly prepared. No presumption shall arise against either Party as drafter.

21. Exhibits:

Exhibit A. Preliminary Alignment and Point of Delivery
Exhibit B. Wastewater Treatment Charge and Initial Billing Provisions
Exhibit C. Project Scope, Responsibilities, and Milestone Schedule
Exhibit D. Columbia Pump Station Upgrade Scope and Budget

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed by their duly authorized representatives as of the dates stated below.
